

AAAs[®] 420

WEEDS CONTROLLED	RATE	CRITICAL COMMENTS
Annual Ryegrass, Silvergrass, Perennial grasses.	200mL per 100L spray solution.	For improved control of these weeds, add to recommended rates of Roundup MAX herbicide, Roundup CT broadacre herbicide, Roundup Dry herbicide, Roundup herbicide Nufarm Glyphosate CT and Weedmaster Duo herbicide. Use in accordance with herbicide label directions.

DIRECTIONS FOR USE:

To minimize antagonism to tank mixture with flowable herbicides:

Prepare AAAs 420 at a rate of 2L/100L of Spray solution. To improve performance under adverse environmental conditions: Prepare AAAs at a rate of 2L/100L of spray solution.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

AAAs 420 should be used with non-selective herbicides only, as with some selective herbicides use may result in loss of selectivity and therefore crop damage. Ammonium sulphate may be corrosive to metal parts of the sprayer. Thoroughly flush tanks, pumps and nozzles after use.

MIXING INSTRUCTIONS:

Half fill the tank with clean water and start agitating. Add AAAs 420 through the top opening of the spray tank. With agitation still running, add the required flowable herbicide to the tank and mix thoroughly. Add surfactant, if required, near the end of the filling process to minimise foaming. Always maintain adequate agitation during application and use the tank mix promptly.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN.

Store in the closed, original container in a cool, well-ventilated area.

DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank or knapsack mix.

DO NOT dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers should not be burnt.

Refillable containers (110L, 1000L)

Empty contents fully into application equipment. Close all valves and return to designated collection point for refill or storage.

SAFETY DIRECTIONS:

Avoid contact with eyes and skin.

FIRST AID:

If poisoning occurs, contact a Doctor or Poisons Information Centre (Phone Australia 13 11 26).

MATERIAL SAFETY DATA SHEET:

For further information refer to the Material Safety Data Sheet (MSDS), which is available from the supplier.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT:

DO NOT contaminate streams, rivers or waterways with chemical or used containers.

CONDITIONS OF SALE:

The use of AAAs 420 being beyond the control of the Manufacturer, no warranty expressed or implied is given by Australian Adjuvants Pty Ltd regarding its suitability, fitness or Efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and Australian Adjuvants Pty Ltd accepts no responsibility or any Consequences whatsoever resulting from the use of this product.
