

BioAAid VOC

DIRECTIONS FOR USE:

The volume of BioAAid VOC used is relative to the amount of pesticide in the spray mix.

Use BioAAid VOC up to 1:2 on a volume basis with the chemical to be applied. The following dose rates should be used as a guide.

WITHHOLDING PERIODS – NOT REQUIRED WHEN USED AS DIRECTED.

DOSE RATE SITUATION	RATE	CRITICAL COMMENTS
Boomspray / Broadcast	1 – 2 L/ha	Use the lower rate when using low dose rate chemicals
Hand gun / Spot Spraying	200mL / 100L water	
Knapsack	20 – 30mL / 10L water	
Orchard Spraying	100 – 200 mL / 100L (high Volume)	Do not use on table grapes during final stage of fruit growth as Oil may disturb the bloom.
Vegetable Spraying	100 – 250mL/100L (high Volume)	
Aerial or ULV	1 – 2 L/ha (low volume)	
Misting Machine	1 – 2 L/ha (low volume)	

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS:

BioAAid VOC will maximise the performance of horticultural and agricultural sprays by increasing droplet deposition, droplet spread and uptake into the target. BioAAid VOC is designed to aid the formation of uniformly sized spray droplets, to reduce evaporation and therefore minimise drift.

BioAAid VOC is non-phytotoxic at recommended rates and is compatible with most herbicides, insecticides, fungicides and other foliar sprays.

MIXING INSTRUCTIONS

1. BioAAid VOC must always be pre-mixed with the pesticide or foliar spray prior to adding to the spray tank or water. For small volumes of spray mix BioAAid VOC thoroughly with the applicable pesticide or foliar spray.
2. If the pesticide is a wettable powder or dispersible granular formulation add water to the pesticide on a one to one basis and mix into a slurry. Add this mixture to the measured amount of BioAAid VOC and follow the mixing instructions.
3. One third fill the spray tank with water.
4. Add the pre-mixed spray to the water in the spray tank.
5. Top up the spray while continuously agitating.

PRECAUTIONS:

1. Always mix pesticides into BioAAid VOC one by one. DO NOT mix pesticides together and then add BioAAid VOC.
2. It is recommended that when applying to a crop or test area for the first time or in combination

with other chemicals a small test area should be sprayed and observed prior to the total crop spray. Avoid spraying in high temperature or humidity conditions.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank.

DO NOT dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and Deliver packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots. Do not burn empty containers or product. For 1000L containers – Empty contents fully into the application equipment. Close all valves and return to the point of supply for refill or storage.

PROTECTION OF LIVESTOCK, FISH, CRUSTACEANS AND ENVIRONMENT:

DO NOT contaminate streams, rivers or waterways with chemical or used containers.

SAFETY DIRECTIONS:

Avoid inhalation of spray mists. Wear appropriate

clothing as per the relevant agricultural chemical manufacturer's specifications.

Avoid contact with eyes and skin.

FIRST AID:

If poisoning occurs, contact a Doctor or Poisons Information Centre (Phone Australia 13 11 26).

SAFETY DATA SHEET:

For further information refer to the Safety Data Sheet (SDS), which is available from the supplier.

CONDITIONS OF SALE:

The use of BioAAid Liquid Assist being beyond the control of the Manufacturer, no warranty expressed or implied is given by Australian Adjuvants Pty Ltd regarding its suitability, fitness or Efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and Australian Adjuvants Pty Ltd accepts no responsibility or any Consequences whatsoever resulting from the use of this product.
