

Gibraltar

DIRECTIONS FOR USE:

Crop	RATE/100L (of water)	CRITICAL COMMENTS
Pasture - Grass Dominant	40 – 80 mL/ha	<p>To stimulate winter growth of grass dominant pasture for high intensity grazing.</p> <p>Apply in a minimum volume of 100 L/ ha with a nonionic wetting agent such as Supa-wet 1000 Wetting Agent at 10 mL/100L. Stimulation is dose dependent with higher rates giving greater stimulation.</p> <p>A single application may be made to temperate grass dominant pasture at any time from the beginning of June until early September. Multiple applications can be made at a minimum interval of 27 days with final application no later than early September.</p> <p>Ensure pasture is grazed before application.</p> <p>Gibraltar is foliar absorbed so ensure that pasture has adequate leaf coverage prior to application.</p> <p>Growth stimulation is usually seen within 7 days of application and ceases around 3-4 weeks after application. Responsive grasses usually become yellow-green in colour as the rapid growth occurs. The pasture returns to a normal darker green after about 3 weeks.</p> <p>Pastures should be at least 1 year old prior to Gibraltar application.</p> <p>Ensure adequate soil moisture to support rapid plant growth. Soil fertiliser levels have to be sufficient to allow for the increase in pasture production.</p>

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Apply in water. Note: 10 mL product per 100 L = 10 ppm active ingredient. Do NOT allow the solution to stand for more than 24 hours.

MIXING INSTRUCTIONS

Ensure the spray mix is in the pH range of 4.0- 6.0, however optimum results occur when the spray mix is in the pH range of 4.0-4.5. Use a portable pH meter or calibrated pH strips to determine the spray mix pH. Sample 2 or 3 times and average the reading. Adjust high pH's with a suitable acidifying solution and recheck the pH after 5 minutes agitation.

A Nonionic Wetting Agent can be used at a rate of 10mL/100L of Solution.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT:

DO NOT contaminate streams, rivers or waterways with chemical or used containers.

STORAGE AND DISPOSAL:

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a well-ventilated area. Do not store for prolonged periods in direct sunlight.

Triple rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean container to recycler or designated collection point. If not recycling, break, crush or puncture and deliver to an approved waste management facility. If an approved waste management facility is not available, bury the containers below 500mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS:

May irritate the eyes and skin. Avoid contact with eyes and skin. When using or preparing product wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), elbow-length PVC/rubber gloves and goggles. If product on skin immediately wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.

FIRST AID:

If poisoning occurs, contact a Doctor or Poisons Information Centre (Phone Australia 13 11 26). If skin contact occurs, remove contaminated clothing and wash skin thoroughly.

SAFETY DATA SHEET:

For further information refer to the Safety Data Sheet (SDS), which is available from the supplier.
