

QUENCH™ PRO

DIRECTIONS FOR USE:

RATES OF APPLICATION:

SITUATION:	RATE (mL/100L)	CRITICAL COMMENTS
Use with non-selective herbicide products as a water conditioner	200 - 500	Always use the higher rate during summer fallow spraying, when weeds are stressed, or when dust is present. Please see below under "Mixing" for mixing instructions.
Use with pesticides products as a water conditioner	200-500	Always use an adequate quantity to ensure that the tank mix is red in order to ensure that an appropriate pH level has been reached. Please see below under "Mixing" for mixing instructions.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS:

Quench Pro Water Conditioner should be used with non-selective herbicides only. Use with selective herbicides may result in loss of selectivity and consequential crop damage.

Quench™ Water Conditioner is a product designed for use where hard water may cause detriment to the activity of the pesticide active. A typically example would be with glyphosate herbicidal formulations.

Quench Water Conditioner components will help the performance of glyphosate herbicides by:

Improving performance in hard water:

Quench™ Pro Water Conditioner will reduce the effects of "hard water" ie. water that contains high levels of free calcium and magnesium ions that can cause antagonism with the glyphosate herbicide.

MIXING:

Half fill the spray tank with clean water and start agitation. Add Quench™ Pro Water Conditioner to the spray tank and mix for 5 minutes in order to thoroughly condition the spray water. Add all non-glyphosate based herbicides next. Then add the required amount of glyphosate based product last followed by the remaining water and mix thoroughly. Always maintain adequate agitation during application and use the tank mix promptly. Always consult the herbicide label for exact application rates.

Thoroughly flush tanks, pumps and nozzles with water after use.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT:

DO NOT contaminate streams, rivers or waterways with chemical or used containers.

STORAGE AND DISPOSAL:

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a well-ventilated area. Do not store for prolonged periods in direct sunlight.

Triple rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean container to recycler or designated collection point. If not recycling, break, crush or puncture and deliver to an approved waste management facility. If an approved waste management facility is not available, bury the containers below 500mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS:

May irritate the eyes and skin. Avoid contact with eyes and skin. When using or preparing product wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), elbow-length PVC/ rubber gloves and goggles. If product on skin immediately wash area with soap and water.

After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.

FIRST AID:

If poisoning occurs, contact a Doctor or Poisons Information Centre (Phone Australia 13 11 26). If skin contact occurs, remove contaminated clothing and wash skin thoroughly.

SAFETY DATA SHEET:

For further information refer to the Safety Data Sheet (SDS), which is available from the supplier.
