

BioAAid® MSO

DIRECTIONS FOR USE:

SITUATION	RATE	CRITICAL COMMENTS
Broadacre and Boom Spray	200ml - 1L/100L Water	Use the lower rate when using low application rate products
Aerial, CDA or ULV	200mL - 2 L/Ha	
Hand Gun (Spot Spraying)	150mL - 300mL/100L Water	
Knapsack	15mL - 20mL/10L Water	
Tree Orchard Plantation Spraying	(High Volume) 100mL - 200mL/100L	

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS:

BioAAid MSO Spray Adjuvant will maximise the performance of horticultural and agricultural sprays by increasing droplets deposition, droplet spread and uptake into the target. BioAAid MSO Spray Adjuvant is designed to aid the formation of uniformly sized spray droplets, to reduce water evaporation and therefore minimise drift. BioAAid MSO Spray Adjuvant mixed sprays are rainfast, within minutes of application. BioAAid MSO Spray Adjuvant is non-phytotoxic at recommended rates, and is compatible with most commonly applied chemicals. It can be used with herbicides, fungicides, insecticides and other foliar sprays.

MIXING:

1. Fill spray tank to three quarters of required water volume.
2. Add pesticides to spray tank with agitation system actively moving.
3. Add BioAAid MSO Spray Adjuvant to spray mix.
4. Top up with water to required volume.

CAUTIONS:

1. Always add pesticides into spray tank one at a time. DO NOT mix pesticides together before adding to spray tank.
2. To avoid any excess uptake of pesticide material damaging the crop, always test the rate applied by application to a small area prior to full scale spraying with a new product or in high temperature or high humidity conditions. Avoid spraying in the heat of the day.

COMPATIBILITY:

BioAAid MSO Spray Adjuvant is compatible with most commonly used agricultural and horticultural products. Always check the label of the product to be mixed with BioAAid MSO Spray Adjuvant.

PROTECTION OF LIVESTOCK, FISH, CRUSTACEANS AND ENVIRONMENT:

Toxic to fish. DO NOT contaminate streams, rivers or waterways with chemical or used containers.

SAFETY DIRECTIONS:

Avoid contact with eyes and skin. Avoid inhaling vapour or mists. When preparing solutions of BioAAid MSO Spray Adjuvant, wear face shield or goggles and PVC/rubber gloves and overalls, however the safety directions on the pesticide label take place over these instructions.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a cool, well-ventilated area, as cool as possible out of direct sunlight. Store away from food, drink and stock food. Triple or, preferably, pressure rinse containers before disposal. Add rinsings to spray tank or knapsack mix. DO NOT dispose of undiluted chemicals on-site. Break, crush or puncture and bury empty containers in a local authority landfill. If not available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and tree roots. Empty containers should not be burnt. 110L and 1000L.

Empty contents into application equipment. Close all valves and return to designated collection point for refill or storage.

FIRST AID:

If poisoning occurs, contact a Doctor or Poisons Information Centre on 13 11 26

MATERIAL SAFETY DATA SHEET:

Additional information is listed in the Material Safety Data Sheet.
